06/01/11 00:00 CST 0 Drought

06/30/11 23:59 CST 0.85M

Beneficial rainfall in late May provided some temporary relief from the prolonged drought, but below normal rainfall during June, combined with the beginning of what would be a grueling, hot summer, brought quickly worsening drought conditions across much of north Texas. Around the middle of the month, another few days of storms brought several inches of rainfall to mainly the northern and eastern counties of north Texas; but the remaining areas received less than normal rainfall amounts this month. All but the north and northeastern counties of north Texas were classified as Severe Drought (D2), and several counties northeast of the DFW Metroplex were not classified in drought this month. Throughout the month, Extreme Drought (D3) and Exceptional Drought (D4) continued to slowly overspread the southern and western counties of the region. The impacts on the agricultural economy were growing as soil moisture continued to decrease. Grasses were having a difficult time growing and low stock ponds were forcing ranchers and farmers to sell, move, or cull cattle. A total of 37 counties had Burn Bans this month. On June 24th, the USDA issued a disaster declaration for all of Texas. Thirteen north Texas counties were classified as contiguous natural disaster areas and the remaining 33 counties were declared primary natural disaster areas.

(TX-Z118) TARRANT

06/04/11 13:00 CST 1 0 Heat

06/04/11 18:00 CST 0

Direct Fatalities: M52VE

Two heat related deaths occurred on June 4th; one directly related and the other indirectly related. A 52-year old male was found inside his car in Fort Worth during the late afternoon hours. The medical examiner determined he died from hyperthermia. Temperatures on this day were in the mid to upper 90s and a heat advisory was not in effect. Also, the medical examiner determined heat was a contributing factor in the death of a 51-year old Denton man, but the heat was not a main factor in his death.

HENDERSON COUNTY	EUSTACE [32.30, -95.98]	

06/05/11 16:40 CST 1K Hail (1.75 in)

06/05/11 16:40 CST 0 Source: Law Enforcement

A few quarter to golfball sized hail stones were reported in Eustace.

MCLENNAN COUNTY --- 1.9 SW EDDY [31.28, -97.28]

06/05/11 18:58 CST 0 Hail (1.00 in)

06/05/11 18:58 CST 0 Source: Trained Spotter

Quarter sized hail fell on the southwest side of Eddy.

CORYELL COUNTY --- 1.4 NW OGLESBY [31.44, -97.53]

06/05/11 19:45 CST 40K Thunderstorm Wind (EG 61 kt)

06/05/11 19:45 CST 0 Source: Newspaper

The chimney of a home on Knowles Road near Ogelsby was knocked off the home by strong thunderstorm winds. A tractor and three cars on the property were also damaged. The carport at his neighbor's house was blown across the yard.

An upper level ridge was in place across the region, but a weak disturbance moving around the southeastern flank of the ridge sparked some afternoon storms across parts of north Texas. Two reports of severe criteria hail and one report of wind damage was received.
